

November 14, 2011

Dear Members,

The 2011 Year for the Edmonton Chapter of the CSSE was very busy and I would like to take the time to recap some of our great events.

We had one of our most successful Bring your Boss to lunch events with the Minister of Employment and Immigration. This ended up as a large media event where a major announcement was made about the future plans of Occupational Health and Safety in the Province of Alberta. This was a very well attended event and the feed back that we received was excellent.

Once again we had another successful NAOSH Speakers Conference, with an unusual set up of a panel of speakers who separately discussed their roles in the event of an incident from the day of injury through to the prosecution. This proved to be very valuable for our members and industry.

Golf at the Red Tail Landing, a beautiful day and we were offered many different suggestions by the members as to what they want to see at next year's event. We are already looking forward to the new and improved 2012 Tournament.

Recently we had a speaker from the Alberta Government who discussed the new Distracted Driving Legislation. The members that attended this function asked fantastic questions and helped clear up a lot of confusion about the topic.

These events are always well attended by you, our amazing members, and would not be possible with out all the volunteers. At the upcoming Members Appreciation Event on November 17, 2011 we the volunteers have created the last event for the 2011 year; a Thank you for all the members. I hope that you can take the time to join us at the Edmonton Country Club to meet the volunteers who work hard to make the Edmonton Chapter so successful and meet other members for some excellent networking.

There is still room for this event, you can register at www.edmontoncsse.org

On behalf of the Edmonton Chapter of the CSSE, I would like to wish you all a very safe happy holiday season. See you Thursday and in 2012.

Cheers,

Raeleigne Van Patten, CRSP
Chapter Chair
Edmonton CSSE
