Paul Pascoe — Safety Solutions Group Australia

This workshop is based upon more than 25 years experience of speaking and learning. It is also based upon research we have conducted from around the world from so many different resources and we have compressed this research into this one day program dynamic program.

Let Me Entertain You!

The safety profession deals with a very important topic, which is, primarily, about saving lives. Safety presentations have gained a poor reputation because of the way they have been presented and the lack of entertainment value. This workshop helps the presenter to change this perception.

As a participant you will take away:

- **1 day of entertaining information that you can use back at your workplace**
- **A participant's hand-book**
- **Checklist/forms/actions for you to take in your own organization**

Workshop Process

- Participants are requested to bring to the workshop one of their favourite Presentation/Training Package.
- Opportunities to make some comparisons and look at ways of improving
- Chance for practice and application and not just sitting there listening.
- Comprehensive notes which contains a transcript of all the information.
- The Work Books are designed to walk away with something to do.
