

**PROFESSIONAL
DEVELOPMENT SERIES
RISK MAKER, RISK TAKER!
A MANAGER'S GUIDE TO RISK**

FRIDAY MAY 2, 2008

**8:00 AM TO
4:30 PM**

**ROYAL GLENORA CLUB
11160 River Valley Road Edmonton, AB**

This workshop shows managers the steps to manage the risks in their environment, and how cracks may occur in the risk process which could threaten the organisation's ability to achieve its objectives, and in some cases its survival.

It is a session designed for use and application in all industries and organisations for line management and in specialist areas including quality, health and safety and environment.

The workshop program fully integrates with the AS/NZS 4360 Risk Management Standard and will provide an ideal tool for the committed risk management team to get the message understood across the organisation to all managers.

Participants will learn from real case study examples where the management of risk affected the businesses. Some with positive consequences and some with dire consequences.

Real events and actual footage create this absorbing study of risk management.

Through a range of actual industry examples where the management of risk has affected the business, the workshop will demonstrate the **7 specific steps** essential to the risk management process.

The industry events and actual footage used in the presentation include:

- Enquiry launched into patient deaths
- Shoppers injured in sales stampede
- Lives lost in refinery explosion
- Demolition goes badly wrong
- Concorde grounded after disaster
- Tragedy strikes navy's biggest ship
- Interviews with Kevin W Knight (Chairman ISO Working Group on Risk Management Standards) and Kimberley Turner (CEO Global Risk Alliance) weave these stories together and help communicate concepts central to the management of risk.
