

**Workplace safety...
good business,
great career!**

Occupational Health and Safety Certificate Program University of Alberta, Faculty of Extension

Education is a key element in reducing workplace injuries and fatalities. The OH&S Certificate Program is designed to help practitioners from many different backgrounds develop the competencies needed to be effective in the development, implementation, and evaluation of occupational health and safety programs and systems in a wide variety of workplace settings. It is intended for both working practitioners and those aspiring to a new career in OH&S.

- Flexible schedule
- Open start date
- Full-time and part-time funding available for those who qualify
- Preparation for registration as a Canadian Registered Safety Professional (CRSP)
